01 About Us

The team behind
PicPlace

02 Summary

Wait, what is

PicPlace?

1. Users **upload** pictures, tag where it was taken.
2. Combine into a location **guessing game**.
3. Account creation, play games **in a time limit**.
4. Engage with others through **likes, comments, and sharing**.
5. **Moderation**, so no inappropriate photos/comments are shared.

Who benefits from PicPlace?

1. People who are **bored of traditional, boring** location guessing games.
2. Fandom members looking to **become more immersed**.
3. Community organizers looking to **increase engagement from members**.
4. People who (*correctly*) think **Geoguessr is too hard**.

What PicPlace Offers

Quiz creation

Community members can **add, edit, or manage their quizzes**, with a variety of answer selection types.

Quiz playing

Users can share **their location and play quizzes**. The quizzes will be in varying forms of multiple choice, map selection, or image input.

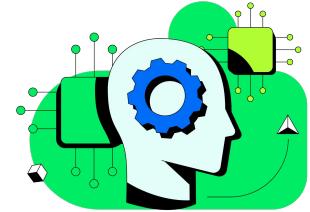

Community Contributions

Users can **comment, like, and report** quizzes. They can also share quizzes, and create their own profile.

Administrator control

Administrators and moderators will be able to see and **remove reported quizzes**, as well as ban users.

Under the Hood

Quiz Data

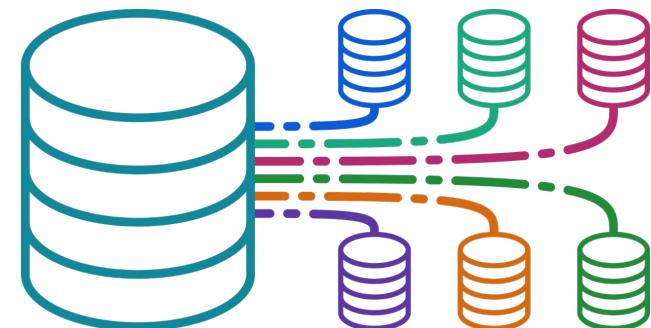

Game data will be **stored in a database**, will relevant information such quiz name, links to the images used, and number of votes.

Weighting system

Quizzes will be **suggested to the users based on a variety of factors**, namely, the number of likes that a quiz has, as well as the number of games that a user has played.

Authentication and Authorization

To accommodate for varying users, we will have the notion of **authorization and authentication**.

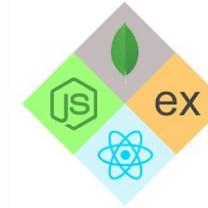

Technologies

HTML, CSS, JS

Standard technologies for web development.

MERN tech stack

The MERN tech stack will be used to create a modern and robust web application.

Tailwind

Used to simplify the design process.

APIs

Various APIs such as Google maps.
